M.S. Health and Medical Informatics

Brandeis University

09/2016 - 12/2018

Waltham, Massachusetts

B.A. Sociology

CUNY Queens College

01/2010 - 12/2014

Queens, New York

SKILLS

JavaScript

React

Ruby on Rails

Ruby

SQL

MongoDB

Node.js

Express

HTML

CSS

Tableau

Excel

jQuery

PERSONAL PROJECTS

Weekly Fitness Schedule

- <https://boring-kirch-f1160a.netlify.app/> - <https://github.com/dkwatson522/rod-get-wright>
- Created a React application to track workout schedule to gain a better understanding of state management with Hooks.

Dunder Mifflin Employee Portal

- <https://stark-mountain-68376.herokuapp.com/> - https://github.com/dkwatson522/dunder_mifflin_employee_portal
- Created a full-stack web application utilizing Ruby, Ruby on Rails, React and PostgreSQL to mock an employee portal.
- "Employees" are able to create requests generating an email notification to their "Manager" to Approve/Deny requests.
- Utilized recursive relationship with user authentication to establish Employees - Manager relationship which enables employees to send an email to their manager when a new PTO request is created.

Sugar Spell Mock Website

- <https://www.sugar-spell.com/> - <https://github.com/dkwatson522/sugar-spells>
- Created a full-stack web application that makes use of Node.js, Express and MongoDB to showcase a candy business.
- Purpose was to gain a better understanding of connecting a web front end with a back end through the use of Express and MongoDB.
- Implemented authentication flow to allow the business owner to manage orders.

Media Quiz

- <https://www.mediaguess.com/> - <https://github.com/dkwatson522/dw-movie-guess>
- Created a web application that utilizes API calls to create dynamic quizzes based on trending topics in entertainment.
- Utilized jQuery to take back user selections to provide feedback on the correct answer for the questions.

TRAINING

All Aboard Bootcamp (03/2021)

Learned Ruby, Ruby on Rails, SQLite, Javascript, HTML and CSS. Worked on creating model, view, controller design pattern with a SQLite database.

General Assembly - JavaScript Development (01/2020)

Studied JavaScript frontend fundamentals through Object Oriented Programming, Document Object Models (DOM), API calls and jQuery
